

As a reseller of AT&T wireless we offer the below listed GSM handsets that have been tested and rated by AT&T for Hearing Aid Compatibility (HAC)

Rating System		Works Well	Works Best				
M-Rating	Hearing Aid Immunity - These phones are less likely to generate interference with hearing devices.	M3	T3				
T-Rating	Compatibility with Hearing Aids with Telecoils - These phones are more likely to work with the hearing devices that have Telecoils.	M4	T4				
Functionality							
Good	A product that scores in this range is functional but unremarkable, containing only basic functions such as calendar, alarm clock, call logs, etc. It is the least expensive.						
Better	A product that scores in this range is very functional and carries different features such as a speakerphone, MP3 player, camera, etc. It's cost is average.						
Best	A product that scores in this range is very functional and quite remarkable. It carries features such as a camera, voice dialing, video, MP3 player, speakerphone, etc. It is typically more expensive.
