

PROTECTOR RELEASE AGREEMENT

The customer named herein has requested a non-standard installation of an electrical surge protector commonly used by the company for incoming telephone lines. Such devices are normally located on the outside of the premises. The purpose of the device is to divert lightning, power surges, and other artificially generated electrical currents from the telephone and the structure.

The undersigned acknowledges that there are certain inherent risks involved in locating a protector inside a structure. These relate to such external factors as lightning, power surges and other causes and may result in fire or other damage to the structure. The undersigned does fully assume all such risk and agrees to hold harmless Yadkin Valley Telephone Membership Corporation from any and all liability there from. The undersigned requests Yadkin Valley Telephone Membership Corporation to install a protector within the premises described below and agrees to pay an installation fee that includes time and material costs associated with such installation. This fee is in addition to normal telephone service installation charges.
